

Chemicals and Energy

Produce. Refine. Market.

Southeast Mississippi is fully invested in meeting the world's ever-increasing demand for chemicals and energy products - the state's two largest exports. Mississippi Power offers superior reliability, world-class customer service and customizable rates.

Impressive Performance

- ▶ Mississippi's energy production and distribution industry employs over 22,000 in Mississippi.
- ▶ Mississippi is one of a handful of states with a CO2 pipeline network.
- ▶ Chevron Pascagoula has grown to be Chevron's largest domestic refinery and one of the top petroleum refineries in the U.S.
- ▶ Chemours in Delisle specializes in the manufacturing of titanium technologies and other chemical applications.

Mississippi Clean Energy Initiative Incentives Program

The program provides enhanced tax incentives to companies that manufacture systems or components used to generate clean, renewable or alternative energy that locates or expands in the state. Qualifying companies that create 250 jobs and make a \$50 million investment may receive a 10-year state income tax exemption, 10-year franchise tax exemption, as well as an exemption from sales and use tax during start-up.

A right-to-work state with a supportive business climate, incentives and expedited environmental permitting.

Excellent transportation with three federal interstate highways, numerous four-lane roads, and access to four in-state commercial airports

The region has access to three in-state Gulf Coast ports with connection to four class I rail lines.

Southeast Mississippi offers industrial sites and buildings, including Project Ready™ certified locations by Mississippi Power.

Trained & Ready Workforce

Mississippi State University has partnered with Mississippi Gulf Coast Community College to offer a four-year engineering degree program to support the chemical and energy sectors in the region.

Accelerate Mississippi is the state's workforce development organization, linking individuals to high-paying careers.

Mississippi's workforce team can design a customized workforce screening and training program strategy to meet new and existing industry.

The Instrument and Controls Academy is an on-going educational partnership between the Mississippi Gulf Coast Community College and Southern Company allowing potential employees to train on cutting-edge instrumentation that will equip them for the challenges of an evolving industry.
