

Data Centers

Infrastructure. Experience. Reliability.

As technology evolves and customer expectations change, Southeast Mississippi is prepared to meet your expanding data center needs. Mississippi Power offers superior reliability, world-class customer service and customizable rates.

Keeping Your World Connected

Southeast Mississippi provides robust fiber connectivity for data centers' evolving technology needs. It offers ample industrial sites, including Mississippi Power's Project Ready™ certified sites.

The area's strong fiber network also hosts significant supercomputers and vital data management suppliers, contributing to its technological prowess.

Competitive Advantages

Mississippi offers a Data Center Incentives Program that provides enhanced tax incentives for companies that store, manage, process or manipulate data.

Mississippi is a right-to-work state with a supportive business climate, aggressive incentives and expedited environmental permitting.

Mississippi Power's team is committed to excellent customer service, focusing on enhanced reliability, power quality and secondary generation solutions.

Trained & Ready Workforce

Southeast Mississippi is home to a skilled and motivated workforce that is supported by a network of community colleges with customized training programs.

Existing businesses have partnered with local community colleges and universities to recruit and develop their future workforce.

Accelerate Mississippi is the newly formed workforce development organization for Mississippi that develops and deploys workforce strategies to connect individuals with transformative, high-paying careers.
